

Payperblock is a freelancer platform for Blockchain experts, powered by Payb Blockchain.

More than \$3.7 billion has been raised through ICOs in the United States alone, during past couple of years. Blockchain-related jobs are the second-fastest growing in today's labour market; there are now 14 job openings for each blockchain developer. Over the next few years blockchain will be acting as a sound infrastructure. It is expected that blockchain projects are dominating the future.

Already now there is a high demand for skilled blockchain professionals. Payperblock platform connects the best blockchain talents with the most interesting and promising blockchain projects.

Payperblock – building a smart future.

PAYB COIN

PayB blockchain will work as a decentralized digital machine, it is a public blockchain technology used for peer to peer contracts. Decentralized autonomous Marketplace (DAM) are primarily a set of complex smart contracts that come together to create a set of rules which regulate the operations of a group of members and their assists.

Now, the PayB token is an ERC20 token. This indicates we are currently running on the Ethereum network. The distribution and transfer of PayB tokens are handled by the PayB smart contract, which is running on the Ethereum network.

PAYB COIN

Ticker: **PayB**
 Token distribution: **10 billion**
 Public sales: **45%**
 Cold Storage: **25%**
 Developer and Advisors: **15%**
 Bounty program and bonuses: **15%**

ERC20 token to PAYB blockchain coin

In Dec 2018, all PayB token holders are able to swap their ERC20 PayB tokens to PayB coins on our own blockchain. PayB Coin, an open source blockchain validated and secured by nodes in the network that run on the Payperblock Proof-of-Stake consensus protocol. Details regarding token swap will be communicated in the nearest future.
